Outdoor cabinet energy storage system is a compact and flexible ESS designed by Megarevo based on the characteristics of small C& I loads. The system integrates core parts such as the battery units, PCS, fire extinguishing system, temperature control systems, and EMS systems.

The system consists of photovoltaic modules, solar grid-connected integrated machine, battery, load, etc. The photovoltaic array converts solar energy into electricity when there is light, and supplies power to the load through the solar control inverter and charges the battery at the same time; when there is no light, the battery supplies power to the solar control inverter and then ...
