The LCD shows 12.5 volt charging voltage. But about 13 volt is the actual voltage as measured in a multimeter. This is perfect as far as charging the battery goes. Read more ...

If you are looking for a hybrid kit, ECO-WORTHY 500W 600W 12V expandable hybrid kit is an ideal choice. This system should be enough to power a tiny home or a super-efficient small home. A 400W wind generator produces about 60kWh per month in 10.5m/s average winds. ECO-WORTHY 100 Watt 12V Mono solar panel is backed by 25-year linear power guarantee. Pure ...

Especially apply to the horizontal and vertical low-power wind generator of 100W to 600W. This type controller has strong compatibility and a great various protection functions, have more 10 years of application practice to improve performance continuously to make it has high reliable and stability. ... Considerations When Buying a Solar Charge Controller. To select a solar charge controller, you need to know the type of system you'll be using it with, whether it be a 12, 24, 48-volt, or 110-volt/220-volt AC system. You also need to know the total number of batteries of your system, as well as their amp-hour capacities.

Hybrid Wind and Solar Diversion Charge Controller Available in 12, 24, and 48 volt options - with LED meter that shows battery voltage. *Compatible with lead acid and AGM batteries - cannot be used with lithium batteries. Comes pre-wired for plug and play with: 600 watt divert load 3-phase brake switch charge controller with LED volt meter re
