Most GM vehicles built in the last 20+ years have a theft deterrent system, that includes the Chevy Malibu. Depending on the model year, your car's theft deterrent system disables the fuel pump, ignitions system, or starter if unauthorized access is detected. When your vehicle Malibu theft deterrent system message, the system will not let

But here is an easy way to add accessory power that comes on and off with your ignition key. The terminals are hidden behind a cover in our drivers side footwell. This is retained accessory power -- "RAP" -- it comes on when you power up the vehicle, and stays on until you open the door, just like the radio. Here's the thread I found it in:

Chevy Malibu 2003, Factory Replacement Wiring Harness by Metra®;, with OEM Radio Plug. ... Don't lose functionality built into your OEM radio if you replace it with an upgraded aftermarket radio or sound system. These interfaces are designed to keep Retained Accessory... From this I can power multiple items that turn on in the accessory position and off when the key is off. Btw... I would seriously love to kick the hind quarters of the decision makers at GM for making me figure this out. Put a damn accessory fused position in the cab we can use like there used to be.

My issue is that the accessory switch power wire came unconnected to the harness. So I do not know where to connect the power wire from my aftermarket stereo. It did come with the constant power connected just not the accessory switch. This seems to be the consensus on the internet for the factory wiring: Radio Battery Constant 12v+ Wire: Red/White

Troubleshooting Common Issues with Retained Accessory Power. Retained Accessory Power (RAP) is a feature that allows certain automotive accessories, such as radios and heated seats, to remain powered after the vehicle has been shut off. This feature can be incredibly convenient for drivers, but it can also cause problems due to its complexity.
