2010 ford expedition power liftgate system operation

of issues slowly working them out. Latest one is I noticed is sometimes if I shut the drivers door the rear power hatch would open. Trying different things I found out that the power hatch mechanism didn't shut...

Opening and closing your vehicle's rear door or liftgate can be difficult when your hands are occupied or if you have a hand injury. Luckily, automakers have introduced a convenient solution. A power liftgate makes it possible for you to open and close your ride's liftgate or rear door automatically with the help of a foot sensor, a button, or a switch.

Replace the lift struts - the power ram only raises the lift gate so far, then the gas-charged struts push it the rest of the way. I replaced mine when they got weak. They are easy to replace, but having a helper to hold the lift gate while you change the struts is very helpful. The Ford part numbers are: Right: 7L1Z78406A10B Left: 7L1Z78406A11B
