Can a 3KW Solar System power a home?

A 3kW solar system can technically power a home but only a very small or energy-efficient one. (In other words, don't expect a 3kW solar system to power an average American home's lights, electronics and appliances.)

Can a 3KW solar system save you money?

The electric bill savings from a 3kW solar system varies widely from state to state. This is because your power bill savings depend on how much energy is produced and how much electricity costs. For example, if your 3kW solar system generates 415 kWh a month in Florida, it will save you about \$46 per month.

How much do solar panels cost?

This is lower than the average price of residential solar power systems across the United States which is currently \$3.00 per watt. The size of a solar panel system also plays a role in how much the installation will cost. Larger solar installations will typically have a lower cost per watt, because the panels can be purchased at a 'bulk price'.
