Golf Cart Lithium Battery Conversion Step-By-Step. Choose the right battery voltage and capacity for your new batteries. The battery's voltage must match the voltage requirement of the cart. You can get either 36-volt or 48-volt lithium GC2 batteries. Each provides 27 Ah (amp hours.) If you want a battery pack with more mileage, you can ...

Set your new batteries in the tray. Our lithium batteries are drop-in-ready. That means they can fit into your golf cart's existing battery compartments. There's no need to make adjustments. Strap the batteries in place with mounting straps/brackets. Be sure to install your lithium batteries in parallel (cables go positive to positive).

What type of battery do I need to run my golf cart? Most electric golf carts operate with any deep cycle 36-volt or 48-volt battery system. Most golf carts arrive from the factory with lead acid 6 volt, 8 volt, or 12 volt batteries wired in series* to make a 36V or 48V system. For the longest run time, lowest maintenance costs, and longest lifespan we recommend upgrading to ...
