

Adidas renewable energy

adidas has teamed up with footwear manufacturer Allbirds to create the world's lowest climate footprint sports shoe. Manufacturing and transportation of this shoe are intended to include reusable materials as well as renewable energies. At its corporate sites, adidas operates its own facilities to generate environmentally friendly energy.

SynopsisThe Corporate Renewable Energy Buyers' Principles frame the challenges and common needs faced by large renewable energy buyers. As of January 2017, 65 companies have signed on, representing over 48 million MWh of annual demand by 2020, equivalent to powering 4.4 million American homes with clean, renewable energy.

adidas Group: Portfolio Approach to Internal Funding for Energy Efficiency and Renewable Energy Overview
adidas Group is a multinational sports and clothing manufacturer and retailer with over 2,700 retail locations and 22 million square feet of corporate office space.
