

American solar power companies

Who makes American solar panels?

Get quotes from the top American solar panel installers using the form below. If you are looking for U.S.-made solar equipment, the largest American solar panel manufacturers include Silfab Solar, Mission Solar and First Solar. Additionally, Tesla Energy, Canadian Solar and Qcells produce some solar panels in the U.S.

What are the biggest solar panel manufacturers?

Some of the biggest U.S.-based solar panel manufacturers include: 1. Auxin Solar Founded in 2008 and headquartered in California, Auxin Solar is the nation's longest-running Community Solar Value Project (CSVP).

Are solar panels made in America?

Additionally, Tesla Energy, Canadian Solar and Qcells produce some solar panels in the U.S. Although solar panels manufactured in the U.S. are not necessarily higher quality than panels made elsewhere, investing in American-made solar panels supports domestic solar research and helps create jobs.

Are American-made solar panels any good?

It's worth pointing out that none of the American-made solar panels have cracked the very top tier of our performance rankings (those honors belong to Maxeon, REC, and Panasonic, each of which builds their panels in other countries). But U.S.-made panels such as Qcells and Canadian Solar, are ranked close behind.

What are the most popular American-made solar panel brands?

According to Andrei Gorinchenski, senior editor at A1 Solar Store, the most popular American-made solar panel brands are Silfab Solar, Mission Solar and First Solar. Silfab Solar, one of our top-rated solar panel brands, has solar panel factories in the state of Washington and Toronto, Canada.

Should you invest in American-made solar panels?

American-made solar panels tend to cost more than panels manufactured overseas in countries like China and Korea. However, investing in U.S. solar panels can help support the domestic economy and advance solar research and development. Ultimately, a solar panel manufacturer's country of origin may or may not be a deciding factor for you.

Solar panel systems are made of durable tempered glass and require little to no maintenance for the 25 to 35 years that they will generate power. In most cases, you don't even need to clean your solar panels regularly. If something does happen, most equipment manufacturers include warranties, although warranty terms depend on the company.

In February of 2024, a representative of American Power Company solicited my interest in solar panels. Jordan Bontrager (a company representative) presented a case where I could reduce my current usage and
