Does Arizona have a solar tax credit?

In addition to the federal solar tax credit, Arizona residents are eligible for a 25% state solar tax credit, property tax exemption and sales tax exemption on solar equipment. The Grand Canyon State offers a solar tax credit of 25% of your installation costs, up to a maximum of \$1,000.

Are solar panels tax deductible in Arizona?

Arizona homeowners also qualify for the federal solar investment tax credit, also known as the ITC. This provides a deduction equal to 30% of your solar panel installation costs on your federal taxes. If you are a homeowner, condo owner or cooperative housing corporation member and you own your solar panel system, you are eligible for this credit.

Are solar devices taxable in Arizona?

In Arizona, solar technology and devices are exempt from state property tax. This means that for property tax assessment purposes, the addition of solar technology adds no taxable value. To qualify for this exemption, property owners must provide their county assessor with documentation of purchase and installation costs.

What solar tax incentives are available in Arizona?

In Arizona, the federal solar investment tax credit (ITC) is the most significant solar tax incentive. You may also take advantage of tax breaks, rebate programs, or incentives through Mohave Electric Cooperative or the City of Scottsdale.

How much does a solar system cost in Arizona?

The Residential Clean Energy Credit, formerly known as the federal investment tax credit (ITC), can reduce your solar panel system's cost by 30%. Your entire system qualifies for this incentive, including equipment, labor, permitting, and sales tax. The average cost for a 5 kW solar panel system is around \$10,538 in Arizona.
