

Bard system 5000 power plus service manual

How many bard PLC units can a LC5000 control?

The LC5000 PLC controller is designed to operate up to 12 Bard wall-mount units in a lead/lag fashion, while offering extensive alarming capabilities as well as remote communication.

What if I need assistance installing a bard 575 volt wall-mount unit?

Should any assistance be required during the installation or servicing of this product, contact the Bard Technical Service Department at 419.636.0439. CAUTION: The Bard 575 volt wall-mount unit system has been pre-programmed with what is widely considered to be the best settings for efficiency and operation.

Do I need a bard-linktm LC5000 controller?

NOTE: BARD-LINK™ LC5000 Controller is required for operation when multiple W***2PQ units are used. The Bard Free Cooling Unit system is composed of wall-mounted air conditioners matched with a Bard-Link™ LC5000 lead/lag controller or Bard pAD single unit controller.

Can a bard controller run a WR series wall-mount unit?

The controller cannot run other Bard models or other brands of systems, nor can other controllers run the WR Series wall-mount units. They are a complete system, and must be used together. The Fusion-TEC WR Series wall-mount units operate on VAC power.

How do I troubleshoot a bard alarm?

The following guidelines are included to assist in troubleshooting the system due to operational or performance problems. If the problem can't be resolved using the alarm screens and these guidelines, contact the BARD Technical Service Department at 419.636.0439 for assistance. The entire unit(s) stops working. The alarm resets automatically.

What if I use a bard Pad single unit controller instead of LC5000?

If using a Bard pAD single unit controller instead of the LC5000 controller, the alarm logging and remote communication capabilities of the LC5000 controller will not be available. See page 20 for information on installing and setting up a Bard pAD single unit controller for single unit operation.
