

## Base station energy storage won the bid

Why should you choose a 5G base station?

Besides, the station can provide 7x24h and "plug and play" 5G private network services. With the wide application of ZTE's 5G nomadic base stations, the network will better adapt to differentiated services, and bring better user experiences.

What is New York state's energy storage goal?

This Order formally expands the State's goal to 6,000 Megawatts of energy storage to be installed by 2030, and authorized funds for NYSERDA to support 200 Megawatts of new residential-scale solar, 1,500 Megawatts of new commercial and community-scale energy storage, and 3,000 Megawatts of new large-scale storage.

Why is energy storage important?

Energy storage has a pivotal role in delivering reliable and affordable power to New Yorkers as we increasingly switch to renewable energy sources and electrify our buildings and transportation systems.

Previously, TOPBAND had won orders from China Tower, China Mobile and other customers in the area of communication base station power backup multiple times. The successive winning of bidding shows TOPBAND's strong power in the new energy storage scene.
