

Bc solar power systems

With a commitment to sustainability and quality, we are dedicated to helping you harness the power of the sun with our top-tier solar panels BC and services. Whether you want to reduce your electricity bills, minimize your carbon footprint, or simply embrace a cleaner and brighter future, we have got you covered.

Now, for the first time, BC Hydro is introducing rebates on the installation of eligible solar panels and energy-storage batteries for customers looking to make that choice. For homes, it's as much as \$5,000 in rebates for installing an eligible solar photovoltaic (PV) system, and \$5,000 for an eligible battery-storage system for homes.

Yes, it is worth installing solar panels in Victoria. Victoria, BC is a great place for solar power due to its high amount of sunshine and relatively mild climate. Solar panels can help reduce your electricity bills by generating clean energy from the sun, which means you can reduce your carbon footprint and save money on your electricity bills.

With a grid-tied system, your solar energy system generates power for use during the day and the utility provides power during the night. By participating in the local utility's net metering program, when you produce more solar power than your home needs, the excess energy is sent out to the grid through your utility meter and you gain net ...

Besolar is the largest solar installer in Southern Vancouver Island. We have been in business for 40 years as the solar division of Brewis Electric Company.
