Are be quiet power supplies overpriced?

I'm saving up for a build and I've found that be quiet power supplies aren't too overpriced in my country, which most brands are. the be quiet! system power u9 600w is selling at about the equivalent of 70usd here. the 700w one is selling for a bit over 80usd. Be Quiet! System Power U9 600w-700w

Does system power U9 700W have a fan?

More information. System Power U9 700W is equipped with a temperature-controlled 120mm fan. It provides you with the low noise operation that be quiet! is famous for, built into an entry-level system. The 80 PLUS Bronze certification is convincing evidence of this PSU's efficient and power saving operation.

Is system power U9 a good PSU?

be quiet! System Power U9 700W PSU Review Crmaris January 3, 2019 Featured Tech Reviews, Power Supplies, Reviews Rating: 7.5. Today we look at the new be quiet! System Power U9 supply in a 700w capacity. The price tag isn't too bad, but for only \$15 extra we can get a fully modular unit with the same or even higher efficiency levels.

Honestly haven't found much of the review of the 9, Tom's Hardware only got the U9. Lemme know, in a nutshell, the difference is? Owned the 500W 9 instead of the U9 here (looked onto the PSU Tier List, at least it's fairly enough on C tier for my budget system), welp, it's kind of cheaper (budget constraints, the difference of the price can cost me one stick of 4 GB ...

Rock-solid stability with two strong 12V-rails; DC-to-DC technology for tight voltage regulation; Four PCIe connectors for support of powerful GPUs

Is the be quiet! 700W SYSTEM POWER U9 reliable? Build Help I have the impression that be quiet is a good and reliable brand but I think this is a budget PSU and wanted to know if it's any good. Don't want to buy it just for the brand because of what happened with seasonic. I also had in mind buying an xpg pylon 650W or a Bitfenix formula bronze ...

System Power U9 600w-700w It actually gets me a bit over budget at about the equivalent of USD1100, with case fans and cpu air cooler, but I can save up a bit more for that. Also, If there is ever a point where RTX 3060 or RTX 3060ti become in stock and reasonably priced, I will get that in place of the rx 5700 xt, its pretty much just what I ...

The System Power 10 750 looks like a big step backward. I used to suggest the System Power (U)9 units to users wanting affordable and reliable PSUs with a high performance per price ratio, but this is not the case for the System Power 10 models. The aged HEC platform cannot match the competition despite the pair of upgrades that it received.
