

Germany's capital Berlin plans to become climate-neutral by 2050. The densely populated, emissions-intensive city phased out lignite coal for power production in 2017 and plans to exit hard coal by 2030. However, renewables only make up a small share of the energy consumed in Berlin today. This factsheet summarises key facts on Berlin's energy mix.

Autarsys is a Berlin-based company that manufactures containerized energy storage systems (ESS) for hybrid renewable energy applications and systems. Our systems make wind and solar powered systems more energy-efficient and cost-effective, increasing the share of renewable energy by up to 90%.
