

Big blue 63 watt solar panel

Can BigBlue 36W solar charger be used outdoors?

The BigBlue 36W solar charger is suitable for use outdoors, such as during a trek, hiking, or camping. It can handle exposure to damp conditions like morning dew or light rainfall. Note: The solar panels charger cannot store electricity; you need to connect your device directly to the solar panels in outdoor sunlight.

What is BigBlue SolarPowa 36 solar charger?

BigBlue SolarPowa 36 Solar Charger comes with folding and highly efficient monocrystalline solar panels, designed as a briefcase to make it easy to carry outdoors.

How many Watts Does a big blue solar charger have?

All three (the Anker 21 Watt PowerPort Solar charger, the Nekteck 28 Watt solar charger, and the BigBlue 28W USB Solar Charger) use the same basic design with two USB-ports and a light to indicate that they're getting a charge; the Big Blue's light indicator is the ammeter.

Does the Big Blue have a battery?

In our experience, the Big Blue (or other similar solar panels) will integrate best into your outdoor lifestyle with the help of an external battery, like the Anker. The solar panel charges the battery, and then the battery provides a steady charge to reliably and safely charge your phone. See our section below on batteries for more details.

What is BigBlue in the Solar Charger?

BigBlue is a company that was founded in 2007. Since then, it has been committed to developing energy storage products with better performance, newer design, and higher safety factor. BigBlue is aimed to 'Clean Safe Fast Energy' for people, making green and clean energy available everywhere.

Is BigBlue solar charger compatible with an iPad?

BigBlue solar charger is compatible with iPad and other devices such as iPad pro, Switch, iPhone, Android cellphones, bluetooth speakers, and some mini power stations or battery packs (less than 150Wh) or similar.

The maximum nominal / rated output of the SolarPowa 100 solar charger is rated based on the Standard Test Conditions (STC) - the industry-wide standard for the conditions under which a solar panel is tested. The test conditions are defined as irradiation 1000 W/m², temperature 25°C, and air mass 1.5.
