Bright Power worked with the owner and the design team to integrate energy efficiency and solar energy into the building's plans from the start. The most notable features include a high efficiency condensing boiler plant that will provide hot water and heat to the building at a combustion efficiency of over 90% and a 114 kW solar PV system.

Bright Solar Technology Co., Ltd. as a comprehensive manufacturer and supplier of PV products, has cultivated in PV industry for 13 years. Our business scope covers R& D, production & sales of PV silicon wafer/cell/module, investment & construction of PV power stations, as well as professional solutions for PV power systems with different requirements.

Solar Water Pumps System. BRIGHT SOLAR, solar pumping system consists of solar pumping inverter, pump and PV array. Consider that storing water is more efficient than storing electricity, the system is designed to directly drive the pump without battery which can reduce the construction and operating cost and routine maintenance effectively.

Like semiconductors, solar PV technology needs purified silicon to get the best efficiency, and the price behind PV solar manufacturing is often driven by the crystalline silicon purification process. Bright Solar offers a range of Solar PV Modules with power ratings from 3 Watts to 350 Watts of Mono- and
