

Chevron renewables

Is chevron a Renewable Fuel Company?

Chevron produces a wide range of high-quality renewable diesel and biodiesel fuels. We aim to grow our renewable fuels capacity to 100,000 barrels per day by 2030. Chevron has invested \$28 million in the Adopt-a-Port initiative, which provides carbon-negative renewable natural gas to truck operators serving the ports of Los Angeles and Long Beach.

Why did Chevron buy renewable fuels (Reg)?

The acquisition combines REG's growing renewable fuels production and leading feedstock capabilities with Chevron's large manufacturing, distribution and commercial marketing position. "REG was a founder of the renewable fuels industry and has been a leading innovator ever since," said Chevron Chairman and CEO Mike Wirth.

What does Chevron's New Deal mean for renewable fuels?

The deal is expected to accelerate progress toward Chevron's goal to grow renewable fuels production capacity to 100,000 barrels per day by 2030 and brings additional feedstock supplies and pre-treatment facilities, the company said in a statement.

Where is chevron's renewable fuels-Reg headquartered?

After the deal closes, Chevron's renewable fuels business, Renewable Fuels-REG, will be headquartered in Ames, where REG has its offices at 416 S. Bell Ave., the companies said. CJ Warner, REG's current CEO, is expected to join Chevron's board of directors.

Will Chevron break out separate financials for its renewable business?

Chevron will not immediately be breaking out separate financials for its renewable business, Chevron Chief Executive Mike Wirth told Reuters.

Does Chevron have a logo?
