

Four LNG tankers, each able to hold 174,000 cubic meters of liquefied natural gas, will be constructed by China State Shipbuilding Corp's Hudong-Zhonghua Shipbuilding (Group) Co Ltd, CSSC and Qatar Energy jointly announced on Tuesday. ... On March 31, Dalian Shipbuilding Industry signed a contract with China Merchants Energy Shipping for ...

An independent energy storage unit has been added to ensure that the ships can still sail safely even if they lose power, according to the Chinese shipyard. The contract, which was signed on April 23, 2024, represents a major milestone for ...

The two liquified CO₂ carriers will be equipped with one 28x4m Norsepower Rotor Sail on each vessel/Source: Norsepower. Norsepower has inked a contract with Dalian Shipbuilding Industry to deliver single rotor sails onboard two newbuild LNG-powered, wind-assisted CO₂ carriers commissioned by the Northern Lights JV.

China has become one of the world's largest shipbuilding countries. By 2010, China's shipbuilding industry has reached the first place in the world in terms of annual shipbuilding completion, annual new ship orders, and handheld orders for the first time. China can be said to be a real shipbuilding power.

With the International Maritime Organization's (IMO) Energy Efficiency Existing Ship Index (EEXI) and Carbon Intensity Indicator (CII) coming into effect at the start of 2023, Rotor Sails can help ship owners improve their ratings against these criteria to help future-proof their fleet," Tuomas Riski, CEO and Partner at Norsepower, said.

The mechanical sails capitalize on the aerodynamic phenomenon known as the Magnus Effect. A couple of months ago, TR Lady, a bulk carrier owned by TR Lady Shipping, a portfolio company of Tufton Investment Management, and employed on a time charter with Cargill, completed its first voyage with Anemoi's rotor sails from China to Australia.

The Paris Agreement set the climate target of holding global warming to well below 2 °C in global mean temperature and pursuing efforts to limit it to 1.5 °C (Christodoulou and Cullinane, 2022). The IMO is dedicated to facilitating the maritime industry to realize carbon neutrality, IMO-2050 target hopes the industrial CO₂ emissions in 2050 could be half of that in ...
