

Citizen 8205 movement energy storage

A while back, a member here, munno, asked me to do a comparison between the 6500 and the 8205, both are used in the HMT watches. He provided the watches for the examination. The two watches in question. The one on the left is powered by the 6500, and is about 36mm across, the one on the right is powered by a 8205, and larger at 41mm:

MIYOTA'S heritage dates back to 1959, when Citizen Watch established a movement-making factory in the town of Miyota, Japan, and traces back to an original spirit of excellence and innovation. Miyota movements are preferred worldwide for their durability, ease of assembly and disassembly and high impact resistance.

Was bored this weekend and decided to take down an old Citizen (Miyota 8200A) movement I had laying around and to practice my Macro Photography on these small parts. That and I haven't seen any real complete walk throughs on these types of movements, but that is likely because they are cheap and people rather just replace the whole movement ...

INSTRUCTION MANUAL FOR MIYOTA WATCH MOVEMENT CALIBER NO. 8205 AUTOMATIC MECHANICAL MOVEMENT INSTRUCTION MANUAL A)DISPLAY *Date & Day of the week position may be located at different position depends on models. B) Winding the mainspring Automatic winding watch can also be hand wound by turning the crown in "A" position.

Miyota is Citizens movement manufacture division like Eta is for swatch. The 8205 is a 21,600 BHP handwinding non hacking movement, the 9015 is a 28,800 BHP handwinding and hacking movement. the 9015 is much newer and more expensive set to battle the 2824 from ETA and the 6R15 from seiko, while the 8100 and 8200 series from citizen are ...

The calibre 8205 also has another descendent - the 820A - which is its decorated version. Or, you can simply say that it is the day/date version of the 8215. ... Citizen / Miyota is no exception. They clearly identified points of failure in 0231 / 65xx and improvised the design on their newer movements. I presume a lot of you are engineers and can appreciate how Citizen or Miyota has innovated. 65xx is better than 0231. 8205 is better than 65xx 8205 / 82S0/82S5 with hacking is better than standard 8205

The movement has "citizen watch co 8200A unadjusted twenty-one 21 jewels" written. Please I would like to know if its genuine and date of manufacture if possible. Thanks, David. Reply. sweepband says: September 18, 2016 at 00:11. Hi David - the case back info all looks correct, and the model number (4-062019) is an authentic one. So it ...

A mechanical movement uses a mainspring as a dynamic force and governs it with a balance. Using the power of the wound mainspring trying to return to its starting point, the ratchet wheel that contains the mainspring rotates, and in turn the dynamic force is conveyed to the center wheel (with the minutes" hand attached), the third wheel and the ...
