620-megawatt natural gas-fired power plant located in Middletown that exploded 13 years ago and killed six workers.

4. Homeowners will be able to size up their systems to allow for future electric vehicle plug-ins. Under the existing program, customers must size their solar systems to roughly fit their current annual load. That's to prevent homeowners from putting in systems sized to be money-making generators.

The first incentive that would kick in for a solar system in Connecticut is the sales tax exemption that applies to residential solar, geothermal, and other distributed clean energy technologies. The sales tax exemption applies to the 6.35% state sales tax. For a \$25,000 system, that amounts to \$1,587.50 that you won't pay in sales tax.
