Eaton's Cooper Power(TM) series loadbreak elbow connector is a fully-shielded and insulated plug-in termination for connecting underground cable to transformers, switching cabinets and junctions equipped with loadbreak bushings. The elbow connector and bushing insert comprise the essential components of all loadbreak connections.

Connector from Cooper Power Systems is a fully-shielded and insulated plug-in termination for connecting underground cable to transformers, switching cabinets and junctions equipped with loadbreak bushings. The Cooper POSI-BREAK Elbow is a fully rated 200 A switching device, designed in accordance to the IEEE Std

## Cooper power systems cc2c04t

386(TM) standard - latest revision.

Cooper Power Systems, a division of Eaton Corporation, is a renowned global provider of electric transformers and comprehensive solutions for electrical power management. With a legacy spanning over a century, the company has built a solid reputation for delivering innovative and reliable products that meet the evolving needs of the power industry.

COOPER POWER SYSTEMS, LLC. We provide power to industrial, commercial, and residential projects of all scopes. Our team of construction managers and skilled electricians has completed more than 3000 successful projects. Whether we work with you on a large, multi-phase project or on one lasting just a few days, our commitment to quality is the same.
