A low voltage DC distribution system is of two types. Unipolar DC distribution system (2-wire DC system) As the name suggests, this system uses two conductors, one is positive conductor and the other one is negative conductor. The energy is transmitted at only one voltage level to all the consumers using this system. A typical unipolar dc power ...

If the first issue of Absolute Power was a paranoid thriller, this issue is Empire Strikes Back times 1000. You know the good guys will win out in the end (not least of which because DC has announced their titles for October, post-Absolute Power). But right now things are as grim as they've ever been. That's just good superhero comics.
