

What is the impact of Electric Power Systems Research?

Electric Power Systems Research latest impact IF is 4.20. It's evaluated in the year 2023. The highest and the lowest impact IF or impact score of this journal are 4.75 (2022) and 2.70 (2014), respectively, in the last 10 years. Moreover, its average IS is 3.87 in the previous 10 years.

How is Electric Power Systems Research ranked?

The overall rank of Electric Power Systems Research is 4239. According to SCImago Journal Rank (SJR), this journal is ranked 1.029. SCImago Journal Rank is an indicator, which measures the scientific influence of journals. It considers the number of citations received by a journal and the importance of the journals from where these citations come.

What is Electric Power Systems Research?

An international journal devoted to research and new applications in generation, transmission, distribution and utilization of electric power. Electric Power Systems Research is an international medium for the publication of original papers concerned with the generation, transmission, distribution and utilization of electrical energy.

What is the h-index of Electric Power Systems Research Journal?

SJR acts as an alternative to the Journal Impact Factor (or an average number of citations received in last 2 years). This journal has an h-index of 146. The best quartile for this journal is Q1. The ISSN of Electric Power Systems Research journal is 3787796. An International Standard Serial Number (ISSN) is a unique code of 8 digits.

What is impact if 2023 of Electric Power Systems Research?

The impact IF, also denoted as Journal impact score (JIS), of an academic journal is a measure of the yearly average number of citations to recent articles published in that journal. It is based on Scopus data. Impact IF 2023 of Electric Power Systems Research is 4.20. If the same downward trend persists, Impact IF may fall in 2024 as well.

What is power Syst res Electric Power Systems Research?

Power Syst. Res. Electric Power Systems Research is a peer-reviewed scientific journal covering research on new applications of transmission, generation, distribution and uses of electric power. Its current editor-in-chief is Maria Teresa Correia de Barros. According to the Journal Citation Reports, the journal has a 2010 impact factor of 1.396.

Objective International Journal of Emerging Electric Power Systems (IJEEPS) publishes significant research and scholarship related to latest and up-and-coming developments in power systems. The mandate of the journal is to assemble high quality papers from the recent research and development efforts in new

technologies and techniques for generation, ...

Electric Power Systems Research is a peer-reviewed scientific journal covering research on new applications of transmission, generation, distribution and uses of electric power. Its current editor-in-chief is Maria Teresa Correia de Barros. According to the Journal Citation Reports, the journal has a 2010 impact factor of 1.396. [1]

Electric Power Systems Research is an international medium for the publication of original papers concerned with the generation, transmission, distribution and utilization of electrical energy. The journal aims at presenting important results of work in this field, whether in the form of applied research, development of new procedures or ...

Read the latest articles of Electric Power Systems Research at ScienceDirect , Elsevier's leading platform of peer-reviewed scholarly literature ... My account. Sign in. Electric Power Systems Research. Supports open access. 7.5 CiteScore. 3.3 Impact Factor. Articles & Issues. About. Publish. Order journal. Menu. Articles & Issues. Latest ...

Scope: The scope of the International Journal of Electrical Power & Energy Systems (JEPE) is focused on electrical power generation, transmission, distribution and utilization, from the viewpoints of individual power system elements and their integration, interaction and technological advancement. The scope covers modelling of power system elements, their design, analysis ...

During the most recent 2021 edition, 20.41% of publications had an unrecognized affiliation. Out of the publications with recognized affiliations, 32.05% were posted by at least one author from the top 10 institutions publishing in the journal. Another 20.51% included authors affiliated with research institutions from the top 11-20 affiliations. . Institutions from the 21-50 range included ...

ISSN The ISSN of Electric Power Systems Research is 0378-7796 .An ISSN is an 8-digit code used to identify newspapers, journals, magazines and periodicals of all kinds and on all media-print and electronic. Electric Power Systems Research Key Factor Analysis Electric Power Systems Research?ISSN? 0378-7796 ??? ISSN????????? ...

Electric Power Systems Research. Supports open access. 7.5 CiteScore. 3.3 Impact Factor. Articles & Issues. About. Publish. Order journal. Menu. Articles & Issues. Latest issue; ... the conference IPST 2025 on Power System Transients covering all topics related to the electromagnetic transients in electrical power systems. Submission deadline ...

The impact factor of Electric Power Systems Research, and other metrics like the H-Index and TQCC, alongside relevant research trends, citation patterns, altmetric scores, Twitter account and similar journals. ... Journal Rankings; About; Electric Power Systems Research. Journal Metrics (Based on the publications from

the last 4 years) (from ...

Electric Power Components and Systems publishes original theoretical and applied papers of permanent reference value related to the broad field of electric machines and drives, power electronics converters, electromechanical devices, electrical equipment, renewable and sustainable electric energy applications, and power systems.. Specific topics covered include:

The latest impact factor of ELECTRIC POWER SYSTEMS RESEARCH and all the other Web of Science journals is released on 20th June 2024 by Clarivate. Through this web page, researchers can check the impact factor, total citation, journal quartile, and journal aim & scope.

Read the latest articles of Electric Power Systems Research at ScienceDirect , Elsevier's leading platform of peer-reviewed scholarly literature ... Sign in. Electric Power Systems Research. Supports open access. 7.5 CiteScore. 3.3 Impact Factor. Articles & Issues. About. Publish. Order journal. Menu. ... select article Dynamic load ...

Impact Factor: 5.659. SCIMAGO SJR: 1.533. ... While the journal focused on Electric power system, it was also able to explore topics like Wind power, Process (computing), Automatic frequency control and Sensitivity (control systems). ...

The 2022 impact factor of Electric Power Systems Research is 3.5, making it among the top 4% journals. The journal covers the disciplines of Energy, Electrical Engineering ... This graph shows how the impact factor of Electric Power Systems Research is computed. The left axis depicts the number of papers published in years X-1 and X-2, and the ...

Get access to Electric Power Systems Research details, impact factor, Journal Ranking, H-Index, ISSN, Citescore, Scimago Journal Rank (SJR). Check top authors, submission guidelines, Acceptance Rate, Review Speed, Scope, Publication Fees, Submission Guidelines at one place. Improve your chances of getting published in Electric Power Systems Research with ...

IEEE Transactions on Power Systems (TPWRS) welcomes papers on the education, analysis, operation, planning, and economics of electric generation, transmission, and distribution systems for general industrial, commercial, public, and domestic consumption, including the interaction with multi-energy carriers. The focus of TPWRS is the power system from a systems viewpoint ...

o Impact Factor o Abstracting and Indexing o Editorial Board o Guide for Authors p.1 p.1 p.1 p.2 p.2 p.4 ISSN: 0378-7796 ... Electric Power Systems Research is an international medium for the publication of original papers concerned with the generation, transmission, distribution, and utilization of electrical energy. ...

Electric Power Systems Research Impact Factor History. 2-year 3-year 4-year. 2023 Impact Factor . #N/A #N/A #N/A. 2022 Impact Factor . 4.745 4.76 4. ...

Impact Factor: 6.6. SCIMAGO SJR: 3.726. ... including Electric power system, Control theory, Mathematical optimization, Control engineering and AC power. ... and Analysis Tools for Power Systems Research and Education (4120 citations) Definition and classification of power system stability IEEE/CIGRE joint task force on stability terms and ...

Electric Power Systems Research Impact Factor 2024 . The latest impact factor of electric power systems research is 3.3 which is recently updated in June, 2024. The impact factor (IF) is a measure of the frequency with which the average article in a journal has been cited in a particular year. It is used to measure the importance or rank of a ...

While Electric power system is the focus of the journal papers, it also provides insights into the studies of Renewable energy, Reliability engineering, Electricity market and Operations research. The journal articles explore issues in Control theory which can be linked to other research areas like Wind power and Microgrid.

Know all about Electric Power Systems Research - Impact factor, Acceptance rate, Scite Analysis, H-index, SNIP Score, ISSN, Citescore, SCImago Journal Ranking (SJR), Aims & Scope, Publisher, and Other Important Metrics. Click to know more about Electric Power Systems Research Review Speed, Scope, Publication Fees, Submission Guidelines.
