ESP Systems, LLC develops and markets guest customized service systems to the restaurant industry in the United States. The company offers a wireless system that uses wireless technologies and Microsoft platforms to streamline the service model at restaurants. Its system creates a wireless bubble in the restaurant and connects everyone within the

Telecommunication equipment needs a power distribution system which often requires bus bars. For years, ESP has been providing bus bars for major telecommunication companies including VOIP applications. Some equipment uses ESP's standard bussing strips while others specify custom fabricated bus bars for more flexibility and customization.
