Are solar panels worth it in Michigan?

Solar is especially worth it if your local utility company provides a net-metering program, but other Michigan residents without access to a net-metering program may want to weigh all their options. Solar panels are a cost-effective way to decrease electricity bills and boost the resale value of homes in Michigan.

What is the Michigan Solar for all program?

The MI Solar for All program will support solar development for thousands of households in low-income and disadvantaged communities across Michigan through direct financial assistance for rooftop solar, community solar, and energy storage.

What are the benefits of the Michigan Solar for all program?

These benefits will include one or more of the following: household savings, increased access to solar, increased grid resiliency, ownership of residential or community solar systems, and workforce development opportunities. How does the Michigan Solar for All program align with state or local renewable energy goals?

What browsers do I need to access Michigan's solar program?

Please update to a modern browser such as Chrome, Firefox or Edge to experience all features Michigan.gov has to offer. The State of Michigan has been awarded \$156 million for the MI Solar for All program by the U.S. Environmental Protection Agency.

How long do solar panels last in Michigan?

The average solar payback period is between 9 and 12 years, and the life span of solar panel systems is usually between 25 and 30 years. Michiganders are eligible for the Michigan Residential Property Tax Exemption and the federal solar investment tax credit, which help reduce the total long-term cost of a solar energy system.
