

German solar car company

Will a solar electric car come to the US?

German carmaker Sono says its Sion solar electric car will be coming to the US, prompting a lot of questions about what solar cars can do. I checked out a Sion in person during its first US tour and found that the answers are more nuanced than with a big-battery Tesla or a Hyundai Ioniq5 that has trivial solar charging.

Can a solar car charge itself through the Sun?

German automaker Sono Motors is taking pre-orders for an unusual car with big ambition - the Sion, an all-electric car that charges itself through the power of the sun. Sono Motors, founded in 2016, has a mission to "accelerate the revolution of mobility by making every vehicle solar."

Is the Sono Sion a good solar car?

The Sono Sion is a car worth watching on its path to US availability. Its solar story isn't a slam dunk for most US drivers but its promised low price and home powering ability recast the entire vehicle as something more compelling than just a solar car.

Will a solar car be made in 2023?

24th June 2021 - From 2023 Sono Motors plan to have its solar car, the Sion, in series production. The prototype is already well advanced and is now being fitted with a battery that, until now, no German manufacturer has dared to use - by no means the only pioneering achievement.

What is a Solar Electric Vehicle (SEV)?

Our spotlight this go-around is on Sono Motors based out of Germany. This EV startup has developed a solar electric vehicle (SEV) called the Sion that can add up to an additional 150 miles of range per week by harnessing the power of the sun.

Will a solar car save 2500 litres of diesel per year?

6th April 2022 - Munich-based startup Sono Motors on Tuesday announced a change in manufacturing plans for its solar-supplemented Sion electric car. 1st April 2022 - The first bus with a photovoltaic system on the roof is on the road in Munich. This could save 2500 litres of diesel per year and vehicle.

Atlas Technologies, which operates the Dutch solar car company Lightyear, has declared bankruptcy, throwing the entire green car-making operation in serious doubt. Lightyear, which has a fairly low profile in the U.S., made the \$260,000 Lightyear 0, which used solar panels to aid the 61.2-kilowatt-hour battery and achieve 388 miles of range.
