

Get the energy storage terminal

How do I activate all the energy storage terminals?

So, let's see what steps you need to take to activate all the terminals: Research Terminal #1: Take the first Energy Storage Device and move forward and to the right. You'll have practically no other options, so you'll know where to go right away.

How do you find the last energy storage device?

Place the energy storage device near it and break the second seal, which will open more paths. Once that is done, go back to your original spot to pick up the last device. After collecting the third energy storage device, go straight and turn left at the end. You will find the last research terminal near a broken mine car.

How do I repair the energy transfer terminal?

All energy collected will be transferred to the new terminal. To repair the Energy Transfer Terminal, you must use the Terminal's Viewfinder to collect and transfer energy from either the Fixed Storage or Energy Transfer Device. Fixed Storage and Energy Transfer Device Cipher Letters are also present in Genshin Impact's 4.1 update.

What is energy transfer terminals?

Energy Transfer Terminals are puzzle devices that can be found in new regions of Fontaine in Genshin Impact 4.1. See what Energy Transfer Terminals is and how to solve it! What is Energy Transfer Terminal? Energy Transfer Terminals are puzzle devices that look like research terminals located in the new areas of Version 4.1.

How do I get to research Terminal 3?

Research Terminal #3: The last terminal is located straight ahead and to the right of where you picked up the Energy Storage Device. Follow the indicated route to the end of the path and turn left at the last corner. There will be a third terminal behind a wall of crystals.

Where can I find the energy device?

To find the Energy Device, you must first pick it up, which is hidden behind a Geode. Once you have the Energy Device, the timer will start, and you need to find the corresponding terminal within the time limit. Be sure to avoid the floating circles as they will reduce the timer by 30 seconds. Follow this exact path to find the terminal.

Possible future sustainability projects at the terminal include a variety of renewables including floating solar panels as well as energy storage. The terminal is also working with the other logistics divisions within the group - Stolt Tankers and Stolt Tank Containers - on potential future sustainability projects.
