WEC Energy Group (NYSE: WEC) today proposed plans for a new 310-megawatt (MW) solar and battery storage project. If approved, the Paris Solar-Battery Park in Kenosha County would be the largest facility of its kind in Wisconsin. The facility features 200 MW of solar generation -- which is equal to powering 60,000 homes, and 110 MW of battery storage -- ...

Three Wisconsin utilities are considering plans to purchase a 465-megawatt solar and storage facility proposed for southeastern Dane County that would be Wisconsin's largest renewable energy plant. Chicago-based developer Invenenergy last week filed an application with the Public Service Commission for permission to build the 2,400-acre project ...

US distributed generation developer Madison Energy Infrastructure on Monday said it has closed a USD-450-million (EUR 421m) construction-to-term debt facility to fund its next phase of growth. As demand for renewable energy continues to increase, the funding will support the development and deployment of Madison's projects for its network of ...

UW-Madison was a key partner in supporting the development of the O'Brien Solar Fields, which provides 20 megawatts of renewable electricity to the local community. The project is a collaborative partnership between the University of Wisconsin-Madison and a range of businesses and agencies that joined forces under the aegis of Madison Gas ...

UW-Madison aims to receive all of its electricity from renewable energy sources by 2030 and have net-zero emissions by 2048 -- the university's 200th anniversary -- as part of a new sustainability plan to combat climate change. While sustainability initiatives at UW-Madison are not new, the latest push is the first that pulls in all aspects of campus.

"The Columbia Energy Storage Project is just one way we are investing in the communities we serve while building a stronger, smarter and more sustainable energy future," Larsen said. The facility will be built near the current Columbia Energy Center, a coal-fired power plant that's co-owned by Alliant, WEC Energy Group and Madison Gas and ...

The second-largest U.S. oil producer bought biodiesel maker Renewable Energy Group for \$3.15 billion in 2022 to expand its renewable fuels production to 100,000 barrels per day by 2030. The deal brought it 10 biodiesel plants and one renewable diesel facility. ... and Madison, Wisconsin, that combined can process 50 million gallon per year of ...
