

# Home emergency generator

Home standby generators are low maintenance and kick on automatically when the power is lost. With larger capacities, they can do more than just keep the lights on. Whether you need a home backup generator to power your whole house or just a few rooms, you will have no problem selecting the home backup generator that's right for you.

Efficiency is key when it comes to power. Your generator should be able to handle all your needs without using more than 90% of its capacity. What size emergency generator do I need for my home? If you are looking for a generator that is perfect for your home, you first need to determine how much power will be needed from an emergency generator.

A home emergency generator is an emergency backup power source that kicks in when your regular power supply fails. It ensures that critical appliances like refrigerators, heating systems, and lights continue to function during blackouts, maintaining your comfort and safety.
