

How about the energy storage smart refrigerator

Should you buy a smart refrigerator?

Unlike a traditional refrigerator, a smart refrigerator doesn't just offer cool storage space for food. It's an innovative kitchen appliance that offers greater convenience, reduces waste, and improves energy efficiency. While not all of us have a smart fridge at home, it is an option -- as long as you're willing to pay the price.

What is a smart refrigerator & how does it work?

Some smart refrigerators can also track expiration dates and send reminders to use soon-to-expire items before they spoil, reducing food waste. A smart refrigerator can also connect with other smart home devices and smart appliances.

Do smart refrigerators save money?

Some smart fridges, like the GE Profile, also offer an autofill water pitcher that automatically refills filtered water from its docking station inside the fridge. Smart refrigerators can also help you reduce food waste and save money.

Why should you buy a smart-home fridge?

Embrace the smart-home revolution by getting a modern network-friendly fridge that's connected and collected and cool in more ways than one. We may earn revenue from the products available on this page and participate in affiliate programs. [Learn more >](#)

How long do smart refrigerators last?

This is a difficult question to answer due to how new smart refrigerators are. We know the basic refrigeration function is the same, meaning you can expect that portion to last the typical 10 to 15 years a traditional fridge would last.

How much does a smart refrigerator cost?

Typically, you can expect to pay \$2,000 to \$5,000 for a smart refrigerator, with high-end models from premium brands like Samsung Family Hub, Bosch, GE Profile, or LG ThinQ near the upper end. For some of the most advanced models, you can pay upward of \$10,000.

Get the storage your family needs and easily access filtered water with this refrigerator's water dispenser.
