

How is generac powered

What is a Generac generator?

A Generac generator is a standby generator that automatically supplies electricity to your home or business in case of a power outage. These generators are designed to provide a seamless and continuous power supply, ensuring that you don't experience any disruptions during blackouts. But how does a Generac generator achieve this remarkable feat?

How does a Generac home standby system work?

Thanks to the transfer switch technology, your backup generator can start supplying power to your home seconds after an outage begins. Whether you're home or not, your Generac home standby system kicks into action, and continues to power your home until utility power returns.

What are the advantages of a Generac generator?

One of the significant advantages of Generac generators is their automatic operation. When properly installed, these generators can detect power outages and start automatically, even if you're not on-site. This hands-free operation is a lifesaver during storms, vacations, or situations where you can't be present to activate the generator manually.

Are Generac generators reliable?

Generac generators are a dependable solution for backup power needs, and understanding how they work is vital for their proper use. With an engine, alternator, transfer switch, innovative technology, and automatic operation, these generators offer a seamless and reliable power source during outages.

What is Generac Industrial Power?

The company supplies products to the industrial, commercial, and portable generator markets through many different distributors. In December 2009, Generac introduced Generac Industrial Power (a rebranding of its industrial products division) to include new engines, new enclosures, ergonomic changes and aesthetic changes.

Did Generac home backup generator keep family warm during an ice storm?

Carlos M. shares his story on how his Generac home backup generator kept his family warm and safe during an unexpected ice storm. Prepare your home for power outages with the best home standby generator from Generac, the market leader.
