There was knob and tubing wiring still in many areas of the house. In particular to the bathroom where I have only the hot and neutral wires that were coming in to an

How to wire the energy storage knob

old fluorescent light over the sink cabinet.

Knob and tube wiring is obsolete, but it's still common in homes built before 1950. Completely removing it and rewiring a house to current standards starts with replacing the panel with a grounded one. It's a big, expensive job, so many homeowners opt for partial rewiring or quick fixes like GFCIs.

Unbend the outer wire of a paper clip to create your lockpick. The wire from a single paper clip is all you need to pick a privacy lock. Find a small paper clip and unbend it, pulling one end of the clip it's as straight as it can get it. You don't have to unfold the entire paper clip, but one side should be straightened.
