Do solar companies use subcontractors?

A company that utilizes subcontractors would typically handle only sales and marketing, then outsource the installation work to subcontractors. Momentum Solar and Blue Raven Solar, for example, are two solar companies reviewed by CNET that use in-house installers as part of their business model.

Does SunPower use subcontractors?

SunPower, one of the largest solar companies -- and also a top five solar company by CNET -- on the other hand, uses a mix of in-house installers and subcontractors. Why do some solar installers use subcontractors? Installers typically leverage subcontractors to help spread their geographic coverage area.

Does sunlight solar subcontract?

Our focus is simple: solar. We're here for all your solar energy necessities, from installation to maintenance. Sunlight Solar does not subcontract. From permitting to installation, we do it ourselves. We are the #1 subcontractor in the state of Florida, nationally ranked as #265 top solar contractor.

What is the difference between an in-house solar installer and a subcontractor?

An in-house installer would handle every step of the solar install process: sales, marketing, installation, customer service and dealing with any issues that arise post-install. A company that utilizes subcontractors would typically handle only sales and marketing, then outsource the installation work to subcontractors.

Which solar companies use in-house installers?

Momentum Solar and Blue Raven Solar, for example, are two solar companies reviewed by CNET that use in-house installers as part of their business model. Momentum was also named one of CNET's top five solar companies of 2023.

What is an installation subcontractor?

These companies chose their primary service as "installation subcontractor" when applying to the list, and they may also work as developers, installers, electrical subcontractors, EPCs and sales partners. The listed kilowatts installed by each company could be performed within multiple services and not just installation subcontracting work.

Some solar companies rely on subcontractors to perform some-or all-the work during your solar installation. Don't let this put you off: It's entirely standard procedure in the industry. What is alarming, though, is a lack of transparency from installers about who will install your system and why they use subcontractors.
