Does Iraq have a power outage?

Power outages are part of daily life in Iraq, but older generations can vividly recall a bygone era under the previous regime when electricity was stable and consistent. Before the 1980s, Iraq boasted one of the most developed energy sectors in the region.

Does Iraq have a power shortage?

When it comes to oil, Iraq's production has grown, according to the International Energy Agency, but the country has struggled to capture and process natural gas, leaving its electric system vulnerable. "The main pain point in the country is the power shortage," Mohsen said.

What is the goal of Iraq's energy crisis?

The goal should be providing 24-hour electricity for Iraqi citizens, which is critical for stability and economic development. Once the power needs are fulfilled, the priority is to use gas for industrial development and job creation, with any surpluses being exported.

Is foreign help enough to fix Iraq's energy problems?

Foreign help is not enough to fix energy issues; domestic reform is necessary. This past July, Iraq and France's TotalEnergies finalized the Gas Growth Integrated Project, a \$27 billion energy deal aimed at Iraq's natural resources and improving the country's electricity supply.

How has the turmoil impacted Iraq's power infrastructure?

But the turmoil has also undermined the country's ability to maintain and invest in its power infrastructure. This report maps out immediate practical actions and medium-term measures to tackle the most pressing problems in Iraq's electricity sector.

What is Iraq's refining capacity?

Iraq's total operating refining capacity is about 1.2 million b/d.<sup>27</sup> The Iraqi government plans to reduce petroleum product imports by rehabilitating the refining sector and building new refineries, but the government has struggled in its efforts to attract the foreign investment needed in the downstream sector.

**Executive Summary** Iraq has begun an ambitious program to increase its crude oil production and export infrastructure. Iraq plans to increase its crude oil production from today's 3.4 million barrels per day ("bpd") to approximately 7.0 million bpd by 2022. Fundamental to this increase is an increase in Iraq's existing export pipeline infrastructure,

On April 24, 2023, the Atlantic Council's Iraq Initiative convened a hybrid panel discussion to examine Iraq's current economic and energy landscape, and their future trajectory. The panel discussed Iraq's significant
