

# Is it better to lease or buy solar panels

What are the pros and cons of leasing solar panels?

The obvious pros of leasing panels are (1) you will be able to realize immediate savings on your monthly utility costs by choosing a solar panel leasing option and (2) lease payments for your solar system will be lower than your monthly utility costs after installation. Cons? There are plenty:

What is the difference between buying and leasing solar panels?

There are three major differences between buying and leasing solar panels: If you purchase a solar system, either with cash or a loan, you own the system and receive 100% of the benefits that come with it. That includes the 30% federal solar tax credit and any other state, local, or installer incentives.

Should you buy or lease solar panels?

Buying solar panels requires an investment and more decision-making than leasing, but over the long term the benefits of owning your system are hard to beat. Buying your solar electric system outright is best.

Does a solar lease add value to a home?

Most third-party leasing companies offer maintenance and upkeep as part of your lease. Because you don't own the solar panels in a solar panel lease, the solar lease won't add value to your home. On the contrary, leasing solar panels can complicate the sale of your home. If you're locked into a solar lease agreement, you might have to:

Should you buy solar panels?

Buying solar panels requires more initial capital but rewards you with greater savings over the course of your solar system's life. People who purchase their solar panels -- either outright in cash or via a loan -- can offset the high upfront cost by taking advantage of local and federal solar tax credits.

Are solar leases worth it?

Solar leases and PPAs are often conflated, but they're slightly different. "In general, owning a solar installation is the best way to realize long-term financial benefits. Solar leases can be worth it in certain very specific circumstances," says Ben Zientara, a solar industry and policy analyst at SolarReviews.

We think it is better to buy solar panel systems than lease them. From the long-term perspective, buying offers more benefits. However, there are also situations where leasing is a better decision.
