Mid-wheel power wheelchairs have three sets of wheels--small ones in the front and rear, and large wheels in the middle. These wheelchairs are often known for being easy to maneuver in small spaces. Rear-wheel power wheelchairs have small rear wheels that are powered, giving the chair an extra push from the back.

The folding mechanism draws inspiration from children's pushchairs, meaning the wheelchair folds down in seconds by releasing a latch at the rear of the chair. The compact design, combined with a lightweight aluminium frame makes it easy to transport by car or airplane.
