Power wheels battery upgrade is the best way you can improve the ride on time for your kids. You can upgrade the power wheels battery from a 6-volt battery to a 12-volt battery or from a 12-volt battery to an 18-volt battery at home.

To do this, you can either add a 6-volt battery to the 12-volt Power Wheels battery or switch out the 12-volt cell for a new 18-volt battery. Be aware that increasing the speed might burn out your gears and motors so you should think about replacing them sometime down the line.

**Key Features of Power Wheels Batteries.** Voltage Options: Lead-acid is available in 6V, 12V, and 24V configurations, and lithium-ion is available in 12V, 18V, and 24V configurations. Lead-Acid Technology: Power Wheels batteries often use Sealed Lead Acid (SLA) or Valve Regulated Lead Acid (VRLA) technology, which is safe and efficient for children's toys.

The power wheels is an old one we got for free. Then next is a best choice jeep we bought new that has sucked from the beginning. Reading up on it too.
