

Luxembourg city ground energy storage subsidy

Is Luxembourg ready for a low-carbon economy?

Luxembourg is targeting a sharp reduction in emissions by 2030, but new measures are needed to boost investment in renewables and energy efficiency, new IEA report says. The International Energy Agency released its latest in-depth review of Luxembourg's energy policies today, welcoming the country's ambitions to shift to a low-carbon economy.

What is Luxembourg doing about energy security?

Luxembourg is also actively cooperating with neighbouring countries on energy security and is planning to strengthen its electricity grid to support additional imports and domestic renewable generation.

What is Luxembourg doing to ensure a secure supply of electricity?

The IEA report notes that Luxembourg is undertaking actions on several fronts to ensure a secure supply of electricity. The country is aiming to increase domestic electricity generation to cover one-third of national demand by 2030, mostly from solar PV and wind.

Is Luxembourg ready to achieve its energy goals?

"The IEA is ready to support the government's efforts to achieve these goals, starting with the recommendations contained within this report." The report notes that Luxembourg faces challenges in achieving its energy objectives. The country's energy supply is dominated by fossil fuels, and carbon dioxide emissions are rising since 2016.

What challenges does Luxembourg face in achieving its energy objectives?

The report notes that Luxembourg faces challenges in achieving its energy objectives. The country's energy supply is dominated by fossil fuels, and carbon dioxide emissions are rising since 2016. This trend is driven by higher fuel consumption in the transport sector, mostly from fuel sales to international freight trucks and commuters.

Why does Luxembourg need more electricity?

Luxembourg expects its electricity demand to rise as a result of a growing population and economy and the increasing electrification of the transport and heat sectors. The IEA report notes that Luxembourg is undertaking actions on several fronts to ensure a secure supply of electricity.

Subsidies for green, renewable or reduced energy consumption. In Luxembourg City, subsidies promoting sustainability include an additional 50% of the amount allocated by Klimabonus (the state), for installations that improve or promote energy efficiency, sustainability, electric mobility and adaptation to climate change.
