

## Mac power users backup

I have a UPLIFT standing desk. Also an M1 Macbook Pro with 2TB SSD connected to a Caldigit TB3+ dock. From my research, I should get at least a 4 TB drive (2 times 2 TB) for backup, but I think I'll shoot for a 8 TB drive since my next Macbook will have 4 TB storage for sure. Note that I swap personal and corporate Macbooks daily, and I don't want the corporate ...

The same way you'd add power backup for a PC: use a UPS. I know power goes out for hours at a time in some areas, so you could back the UPS with a generator if necessary. When power goes out, 1) start up the generator, 2) unplug the UPS from the ...

You may be right. I don't know much about non-Macbook laptops. However, this is the Mac Power Users so I think I can be forgiven for not specifying Macbooks here. I'm going to need some convincing here by someone with electrical engineering expertise that it's helpful to use a third-party tool to manage MacBook batteries.

5 days ago; 2. Portable Power Banks. For users who desire temporary mobility and limited power backup, portable power banks can provide a solution. These external battery packs typically have USB ports that can be used to charge the Mac Mini or any other USB-powered device.

If her computer fails she can go to the library and sign out a laptop or use a station there and log into Google Drive and get on with her work. She's undoubtedly using IMAP based email so all her mail will still be on a server. I'd also bet all her music and videos are streaming and/or purchased online. If she's using R with tons of custom libraries and hours of survey ...

iTerm2, Homebrew, and 1Password are probably your best bets out of the 77 options considered. "Plenty of great improvements to the default Mac terminal" is the primary reason people pick iTerm2 over the competition. This page is powered by a knowledgeable community that helps you make an informed decision.

I'm a Windows power user, also an occasional Linux user, daily Android user, etc. I've used Windows extensively since version 3.1 (on top of DOS), I installed Windows 95 on THE day it came out (from a stack of floppy disks), I've had high-speed internet since 1995 (unthrottled, un-firewalled university ethernet, where I ran a war\*z FTP site off ...

## Mac power users backup

Creating Mac Power Users, one geek at a time since 2009. Hosted by David Sparks and Stephen Hackett. 24 SEPT 2023; ... David and Stephen talk a bit more about window managers and backup utilities, while also answering listener questions and David's modern typewriter, Stephen's new Plex server and a lot more. 1 hr 43 min;

To enable power when MacBook is running on battery, go to the Battery tab and enable "Enable Power Nap while on battery power." To do the same when Mac is connected to the power, click on the Power Adapter tab and enable "Enable Power Nap while plugged into power adapter." Now Time Machine can run even when Mac is sleeping. So, you can ...

Mac Power Users #715: To Gridfinity and Beyond - Relay FM. It's feedback time, and Stephen surprises David with a secret project after the guys wade through some follow-up. David then returns the favor by booking Stephen's 3D printer for the foreseeable future.

This episode of Mac Power Users is sponsored by: 1Password: Have you ever forgotten a password? You don't have to worry about that anymore.

I just purchased a new Macbook Air M2 13" with an upgrade to 10-core GPU. I have now a 2020 MacBook Air 13" M1 basic specs. It's a slight upgrade for more money, but there it is. I have sold the one I have already and have to hand it over on Friday. But I won't receive the new Mac before 10 days, so I have to rely on a Time Machine backup for setting up the new ...

7 hours ago; Mac Sonoma - I had started a new time machine a few weeks ago. ... on the disk was only one back up instead of the 10 or 15 previous days which had been... Thanks to the native Mac file systems, if a Mac mini or older Mac is feasible, that would potentially make a better backup server than a NAS. I ought to use CCC or Chronosync, either instead of or in addition to Time Machine (whatever is more feasible based on budget and the hard drive setup over time).
