3 For the World Bank, "[e]nergy storage is key to secure constant renewable energy supply to power systems--even when the sun does not shine, and the wind does not blow" (Papathanasiou 2023); for the World Economic Forum, "[s]torage is the key to the renewable energy revolution" and long duration energy storage is "the key to ...

Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy

Maputo bank energy storage supply

consumed per unit of gross domestic product. It effectively measures how efficiently a country uses energy to produce a given amount of economic output. A lower energy intensity means it needs less energy per unit of GDP.
