In St. Kitts, the St. Kitts Electricity Department (SKED) is undergoing a similar process, which is on track to be finalized by the end of 2010. 1.2 Energy Supply 2. Given the vulnerability of the economy of the small island developing state of St. Kitts and Nevis, which is heavily dependent upon imported petroleum, and,

of St. Kitts and Nevis, the state-owned St. Kitts Electric Company (SKELEC) and Leclanch&#233; SA (SIX: LECN) today broke ground on a landmark solar generation and storage project that will provide between 30-35% of St. Kitts baseload energy needs for the next 20-25 years while reducing carbon dioxide emissions by more than 740,000 metric tons.

The country of Saint Kitts and Nevis consists of the two islands contained in its name, Saint Kitts and Nevis. The highest point, at 3,792 feet, is Mount Liamuiga. During the last ice age when the sea level was 200 feet lower, the three islands of Saint Kitts, Nevis and Saint Eustatius (also known as Statia) were connected as one island. Though ...

The economy of Saint Kitts and Nevis depends on tourism; since the 1970s, tourism has replaced sugar as the economy's traditional mainstay. Roughly 200,000 tourists visited the islands in 2009, but reduced tourism arrivals and foreign investment led to an economic contraction in the 2009-2013 period, and the economy returned to growth only in ...

St. Kitts and Nevis aims ...

The culture of St. Kitts and Nevis, two small Caribbean islands forming one country, has grown mainly out of the West African traditions of the slave population brought in during the colonial period. France and British colonists both settled the islands, and for a period of time the British imported indentured Irish servants. The native Caribs, skilled warriors, defended their lands by ...

The island was originally named St. Christopher--a nod to the patron saint of travelers--and later shortened to the one we know today. By 1623, both British and French forces had settled on the island, making St. Kitts the first non-Spanish European colony in the Caribbean.

Over the past several years, St. Kitts and Nevis has implemented several energy efficiency and renewable energy projects. In 2014, a light bulb exchange program was launched to replace existing residential lighting with 323,000 LED bulbs at a cost of roughly \$2.5 million; the manufacturing sector underwent a comprehensive energy audit; and ...
