What makes a good storage integrator?
The integrator should have strong supply chain networksand strategies to cater for your immediate and future storage plans and to internalize any externality. The integrator should have the financial capability to back-up the solution and accompany you in the long run. By Ramy Shahat and Juan Ceballos,Trina Storage

How can a decarbonized energy system research platform overcome intermittency challenges?
A deeply decarbonized energy system research platform needs materials science advances in battery technologyto overcome the intermittency challenges of wind and solar electricity. Simultaneously,policies designed to build market growth and innovation in battery storage may complement cost reductions across a suite of clean energy technologies.

Why should a Bess integrator accompany a client?
Due to battery and components degradation, the system performance changes along the project lifetime, and the integrator should accompany the Client over the entire project lifetime. This implies committing themselves in the long-term to assure that (i) the BESS is well maintained and that (ii) the warranties are respected.
