Who is Sharp Solar?

Sharp Solar, a subsidiary of Sharp Electronics, is a solar energy products company owned by Sharp Corporation and based in Osaka, Japan. The company produces thin film modules and mono and poly-crystalline silicon solar cells.

Who manufactures Sharp Solar panels?

Sharp is a brand that manufactures high-quality solar panels. They have been producing solar photovoltaic (PV) products for 60 years and highly tout their experience and the countless places their solar products are used.

Is sharp a reliable solar power company?

It's been nearly half-century since Sharp's first reliable solar-power solution was first used in a lighthouse. Since then, Sharp has made countless innovations and has grown to a global leader in solar, offering a portfolio of proven solar solutions including monocrystalline, polycrystalline and amorphous silicon.

Why should you choose Sharp Solar power?

We take pride in Sharp's solar power systems, built to our strict quality standards and policies, to provide long-term durability and the confidence that comes with "Japan Quality." We offer megawatt-scale solutions from the design to construction and operation/maintenance of power plants.

Does sharp use solar power?

"SMCA is one of several Sharp facilities around the world that generates a portion of its power through solar electricity, saving the company money and reducing our carbon footprint." Sharp Manufacturing Company of America was established in 1978 for the production of color TVs, and began producing solar panels in 2003.

Are sharp solar panels available in the United States?

Sharp solar panels are not available for purchase in the United States. Instead, consider buying solar panels from brands like Q CELLS and Jinko Solar, which are similar in terms of efficiency, warranties, and cost. The Sharp Corporation has a long history of success in renewable energy.

Founded by Tokuji Hayakawa, Sharp has over 50 years experience in solar development. Although it was founded in 1912 it was not until 1963 that Sharp began mass production of solar cells. The company first pioneered solar power research in 1959 and is today highly acclaimed in this field both in Japan and elsewhere.
