

Simply energy solar feed in tariff

What is a feed-in tariff (FIT)?

Solar energy from your rooftop panels can help you save money. When your rooftop solar panels generate more power than you're using in your home, the leftover solar energy is sent back into the electricity grid. A Feed-in Tariff (FIT) is a payment you'll receive for this unused energy.

Does simply energy offer a boosted solar feed-in tariff?

Simply Energy also offers a solar-specific electricity plan to customers in NSW, Victoria, QLD and SA who have solar panels installed. This comes with a boosted solar feed-in tariff for customers whose systems output less than 10kW. The feed-in tariff on this offer varies from state to state.

Are solar feed-in tariffs a good idea?

Only seven states have offered solar feed-in tariffs, according to the Database of State Incentives for Renewables & Efficiency. As such, if you're a property owner who is considering or has already invested in solar, it is unlikely that a feed-in tariff mechanism impacts the economics of your system.

Does Engie offer a boosted solar feed-in tariff?

Customers who install a system with one of Engie's preferred installers will also be eligible for a boosted solar feed-in tariff as part of the retailer's Solutions Solar offer. Engie also offers a solar-specific electricity plan to customers in NSW, Victoria, QLD and SA who have solar panels installed.

What is the difference between feed-in tariffs and other solar incentives?
