Is smart energy a good battery company?

I have since been approached by Smart Energy regarding a battery, and nothing has changed. Smart Energy's people are helpful, well informed, patient, polite, personable and reliable. This company just oozes INTEGRITY and good intentions. In the words of John Paul Getty..... "Pay a fair price for a good company, never a good price for a 'fair' one".

How good is smart energy?

Thank you. Found Smart Energy great from the get-go. Mac was patient, thorough, competent, informative and pleasant. The installers were also capable, thorough and friendly young guys, and the customer service girls that I dealt with setting up my app for tracking energy etc were also very well informed and helpful.

How much do you save with smart energy?

Despite the regular payments I pay to Smart Energy's finance company, I am saving at least \$100 per quarter and never worry about using power. This is the first winter I have not had to worry about the cost of electric heating. God Bless Smart Energy.

How much power does Smart Energy generate a day?

So far during summer we have seen daily power generation of between 15kw and 40kw from this 6.1kw system which is better than expected. I have been a customer for 3 years at Smart Energy, I was recently contacted to see how my system was going and if I wanted to explore battery options.

I am surprised with the positive reviews on this platform. The experience with Smart Energy SA was riddled with missed appointments, rotation of excuses for missed deadlines which bordered on the bizarre at times. After countless delays the solar system was installed.

Pre my dealings with Smart Energy. Pre my dealings with Smart Energy, and in particular Beth Jones, I had many calls from solar providers. Unfortunately, most seem to have serious problems in answering any questions about their product and indeed the individuals command of the English language was seriously floored.
