Prior to your roof restoration, the solar company will need to install the solar bracks to your roof. This is when it is most likely for broken tiles to occur, allowing the roofing company to come in and replace and breaks on your roof. The roof will need 7-14 days to fully cure before the solar company installs the panels.

At YellowBall Roofing & Solar, we bring over two decades of expertise in solar installation, proudly serving as a qualified installer for NWE Montana, the region's largest electric provider and a preferred partner of the MREA. Our commitment to excellence is reflected in our rapid installation process, boasting the fastest completion time in the industry - just 60 days from start to finish.

Another benefit of doing the roof restoration this way is that the entire roof area can be covered under our 15 year warranty with no areas excluded. The cost of removing solar panels for the purpose of roof restoration does vary depending on the number of panels, the pitch of the roof and the general access to the roof.
