For example, a south-facing 3.5 kW solar PV system in southern England will generate around 3,000 kWh of electricity each year. It would make sense, then, to get a 3 kW inverter, as opposed to a 3.5 kW inverter. A 3 kW inverter is able to power up to 3,000 watts continuously.

There are two categories to consider when deciding on the right solar inverter type: the solar inverter technology, and the type of solar power system the inverter is for. String inverter: A string inverter is a single, standalone unit that converts power from a whole string (or strings) of solar panels.

The Solis inverter price in Pakistan varies depending on factors such as whether the inverter is single-phase or three-phase and the size of the solar panel you choose.
