Who is the best solar company in Las Cruces NM?

With that in mind, here's our ranking of the top five solar companies in Las Cruces, NM based on ratings, reviews, and more. Sunfire Solar is a locally owned and operated Solar Installation company originally located in the El Paso and La... Our main focus is always on quality, both with equipment used and the installation performed.

How do I choose a Las Cruces solar company?

Look for Las Cruces solar companies with a minimum of 3.5 out of 5 stars on Google Reviews and comparable customer review platforms. The company should also have a good rating on Better Business Bureau (BBB). Reviewing previous customer testimonials can give insight into other homeowners' experiences working with the solar company.

How much does solar cost in Las Cruces NM?

The average price per watt of solar power in Las Cruces, NM is \$2.84/W. These prices are before incentives. After the federal solar tax credit, the final cost will drop by 30%, down to \$22,942 for a 11.55 kW system. Many states even offer local rebates and incentives that lower the price further--sometimes by thousands of dollars.

Do I need a solar battery in Las Cruces?

No, you don't need to install a solar battery in Las Cruces. Solar panels can operate and lower your electricity bill even without a battery. However, a solar battery might be a worthwhile investment in some cases. A battery can provide backup power and priceless peace of mind in places with prolonged grid blackouts or extreme weather events.

Why should you switch to solar power in Las Cruces?

Switching to solar is a practical thing you can do to help. If you go solar, your carbon footprint can be lowered by about 100 pounds a year. The advantages of solar power are abundant -- just like solar power is! That's why so many people have been happy with committing to solar. Which solar panel installer is the best in Las Cruces?

Are solar incentives a good idea in Las Cruces?

Solar incentives and rebates can cut the cost of installing solar in Las Cruces by thousands of dollars. The most significant incentive is the 30% federal solar tax credit, available to any taxpayer in the country when they purchase solar panels or battery storage.
