A solar energy system will likely increase a home"s value. A DOE-funded study at the Lawrence Berkeley National Laboratory found that solar panels are viewed as upgrades, just like a renovated kitchen or a finished basement, and home ...

Even if you have the expertise to drill holes through your roof, wire up potentially dangerous equipment, adhere to the relevant local laws and then connect it all to the public power grid or a bank of batteries, installing a solar panel system is a complicated process that"s that you may want to leave up to a professional.

Using a reputable contractor to install solar panels can help ensure they last for about 25 years before they begin to degrade. Solar panels are typically low maintenance and don"t need frequent repairs. They don"t have any moving parts, so they only need cleaning once per year to remove dirt and debris. You may need two cleanings per year ...

How much do solar panels cost to install? On average, installing solar panels costs $2 to $4 per watt. Most systems for homes come up to $10,000-$25,000 after receiving tax credits. The size of the system, quality of the panels and equipment being used, location and difficulty of installation on the roof all affect the final price.

In 2024, you"ll pay about $22,022 to install an 11 kW solar panel system, which is what EnergySage estimates the average U.S. solar shopper needs, after federal tax credits. Due to the high number of variables, though, the end cost of your system can vary widely. For example, if you finance your installation, the cost could rise due to interest ...
