

Solar power buy back rates nz

What are solar power buy-back rates?

Solar power buy-back rates are the price per unit at which energy retailers pay for excess/exported solar power from homes or businesses. The buy-back price ranges between 7¢ to 17¢ per kWh for exported solar power. Up to 40¢ is offered for exported stored battery capacity. View the New Zealand solar buy-back price list below.

Does a good solar buy-back price matter?

For example, a home that uses 50% of the solar power in its home and 50% of its power will be exported will need to focus on getting a good solar buy-back rate. If the home is able to use closer to 80% of the power generated then a good buy-back price won't matter as much.

How do I find the best solar buy-back rate?

Finding the best solar buy-back rate is as easy as checking our list of what retailers are paying. And with a difference of 10c per kWh between the best and worst price, it literally pays to check before signing up. Powerswitch manager Paul Fuge said the buy-back rate had shot up over recent years, with some retailers paying a lot more than others.
